Expertise: Revealing Simplicity in the Complexity

One World in a New World

Explore Harmony
with Self
with Others
with Earth

Apocalyptic Chats
with Thought Leaders

A powerful and timely book that calls for global unity and conscious evolution. It blends personal narrative with visionary frameworks, offering a practical guide for those seeking to embody a deeper connection with the Earth and contribute to a regenerative future.

This masterpiece explores the Planetary Citizens movement, ancient and emerging frameworks for co-creating a regenerative civilization, real-world projects and stories from global voices shaping the New Earth, a new model of transformational leadership, and practices, tools, and pathways to embody planetary citizenship in everyday life.

The Author's work serves as both an inspiring manifesto and a tangible toolkit, encouraging readers to embrace their role as planetary citizens and actively participate in shaping a more harmonious world. It is aimed at seekers, change-makers, educators, entrepreneurs, and elders who feel called to contribute to a better future. ~ *Dennis Pitocco, Publisher, BizCatalyst360*

This short book is both profound and simple in articulating a vision for a better and more harmonious life for us all. How can we walk this path forward together? What steps can we take? How can we lead and follow in order to re-shape our collective future and shared humanity? Zen Benefiel has written over forty books and I have read several of them. This one is my favorite. Every page contains gentle wisdom and guidance to help awaken the heart of humanity. This book is both aspirational and inspirational. It is a gift from Zen Benefiel's heart to all of us. The message is clear. The time is now. Let's create a New World together. Start by reading this book. ~ *Victor Acquista, MD*

Zen Benefiel has delivered another another cutting-edge guide to life and the proper living of it for our times. And he has done so in typical Zen style, with warmth, accessibility, and an abundance of inspiration. This is a book to help us learn how to live simply so that others may simply live. It makes good on the vision and promise of a global, Gaia-centered, Planetary Citizens movement, but Zen shows it to be much more than that. It is an embodied ethos of our time — a way of being and interbeing with each other, life, and all the ways of being, living, and loving that connect us as a species in and with this amazing planet. In short, this is a book about what it truly means to be humankind.

~ *Dr. Alexander Laszlo, Professor of Curating Emergence and Thrivability.*
